

Variable	Value	Description
<i>nDirectQueries</i>	1000	number of direct queries
<i>directQueryDist</i>	248:248:248:156:100	distribution of direct queries (selection:approximation:aggregation:sliding window:joining request)
<i>nPolicies</i>	900	number of unique policies
<i>nRequests</i>	1500	number of matching requests
$\alpha$	0.223	skew parameter for Zipf distribution
<i>maxRank</i>	300	maximum rank of unique requests from which Zipf distribution is generated
