

Dataset	Genes	Samples	Description
GDS181	12626	84	Large-scale analysis of the human Transcriptome
GDS589	8799	122	Multiple normal tissue gene expression across strains
GDS1406	12488	87	Brain regions of various inbred strains
GDS1451	8799	94	Toxicants effect on liver: pooled and individual sample comparison
GDS1490	12488	150	Neural tissue profiling
GDS2520	12625	44	Head and neck squamous cell carcinoma
GDS3715	12626	110	Insulin effect on skeletal muscle
GDS3716	22283	42	Breast cancer: histologically normal breast epithelium
