

Name	Description
Apriori (All, Some, Dynamic Some)	The first algorithm for sequential pattern mining.
GSP	Generalized Sequential Patterns (Max/Min Gap, Window, and Taxonomic constraints).
PSP	Retrieval optimizations and more efficient than GSP.
SPADE	Sequential Pattern Discovery using Equivalence classes.
SPAM	Sequential Pattern Mining with Bitmap representation.
LAPIN	SPM with LAsT Position Induction, which is categorized into two classes, LAPIN-LCI and LAPIN-Suffix.
LAPIN-SPAM	LAsT Position INduction Sequential PAttern Mining.
