

metafeature	description
labelProb	indicator feature for low-frequency labels (<10)
labelProb2	indicator feature for high-frequency labels (>50)
uniqInstancesets	# different instance sets in the classifier outputs
maxVotes	# votes given to most voted instance set
minInstFreq _{<i>i</i>}	the frequency of least frequent instance in the output of classifier <i>i</i>
maxInstFreq _{<i>i</i>}	the frequency of most frequent instance in the output of classifier <i>i</i>
minInstCount _{<i>i</i>}	the count of the lowest count instance in the output of classifier <i>i</i>
instCount _{<i>i</i>}	# instances in the output of classifier <i>i</i>
emptySet _{<i>i</i>}	indicator if the classifier output <i>i</i> has no instances for the label
setCount _{<i>i</i>}	# of classifiers with the same output as classifier <i>i</i>
modePrec _{<i>i</i>}	precision of classifier <i>i</i> using the mode of outputs as reference
modeRec _{<i>i</i>}	recall of classifier <i>i</i> using the mode of outputs as reference
modeJaccard _{<i>i</i>}	Jaccard similarity of classifier <i>i</i> and the mode of outputs
maxPrec _{<i>i-j</i>}	intersection of classifier <i>i</i> and <i>j</i> outputs, divided by maximum length
