

low-level features

k	Number of variable interactions
m	Number of objective functions

high-level features

npo	Number of Pareto optimal solutions
hv	Hypervolume value of a the Pareto set
avgd	Average distance between Pareto optimal solutions
maxd	Maximum distance between Pareto optimal solutions
nconnec	Number of connected components in the Pareto set
lconnec	Proportion of the largest connected component of the Pareto set
kconnec	Minimal Hamming distance to connect the Pareto set
