NoC/Packet flowset parameters	Value
Maximum packet flow no-load latency	100 ms
Maximum period	500 ms
Priority assignment	Deadline monotonic
Route randomisation	Random XY/YX
Standard NoC topology	4x4
Enlarged NoC topology	8x8
Flowsets per data point	100
GA parameters	
Population size	100
Mutation individual task moving probability	0.3
Maximum generations	50
